PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and DevOps enthusiast with hands-on experience in the MERN stack (MongoDB, Express.js, React, Node.js) and modern DevOps practices. Passionate about building scalable, high-performance web applications and automating deployment pipelines. Proven ability to deliver end-to-end solutions from concept to production. Actively seeking entry-level Full Stack or DevOps roles at a global technology organization.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React.js, Redux, Responsive Design, REST API Integration

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Database: MongoDB, Mongoose ODM, Database Schema Design

DevOps & Tools: Git, GitHub, CI/CD Pipelines, Docker (basics), Linux, Bash Scripting

Practices: Agile/Scrum, Version Control, Code Review, MVC Architecture

PROJECTS

Book Exchange Platform | *MongoDB, Express.js, React.js, Node.js* 2024

- Engineered a full-stack web application enabling users to list, browse, and swap books, supporting a community of users with real-time inventory management.
- Designed and implemented a RESTful API backend with Express.js and MongoDB, handling user authentication (JWT), CRUD operations, and search/filter functionality.
- Built a responsive React.js frontend with state management, reducing page load time through component optimization and lazy loading.
- Deployed the application using Git-based workflows, implementing basic CI practices to automate testing and builds.

Dynamic Blog & Content Management System | *MERN Stack* 2024

- Developed a fully functional CMS enabling content creators to publish, edit, and manage articles with rich-text support and role-based access control.
- Implemented secure user authentication and authorization using JWT and bcrypt, ensuring data integrity and user privacy.
- Optimized MongoDB queries and indexing strategies, improving data retrieval performance by an estimated 40%.

Task Management Application | *React.js, Node.js, MongoDB* 2023

- Built a productivity-focused task management tool with features including task prioritization, deadlines, status tracking, and user dashboards.
- Implemented real-time UI updates using React hooks and context API, delivering a seamless user experience across devices.
- Followed MVC architecture principles and maintained clean, documented code with Git version control best practices.

EDUCATION

University of Management and Technology (UMT) Lahore, Pakistan

Bachelor of Science in Computer Science

Oct 2022 – Oct 2026

- Relevant Coursework: Data Structures & Algorithms, Database Systems, Web Engineering, Operating Systems, Software Engineering, Computer Networks.

ACHIEVEMENTS & HIGHLIGHTS

- Independently designed and deployed 3+ full-stack projects demonstrating end-to-end development ownership.
- Applied DevOps practices including Git branching strategies, automated testing hooks, and deployment scripts to personal projects.
- Actively expanding expertise in cloud infrastructure (AWS/Azure), containerization (Docker, Kubernetes), and advanced CI/CD tooling.
- Strong advocate for clean code and documentation – all projects maintained on GitHub with detailed README files and commit histories.
